

# Medicine in extreme conditions

**Human:** Safeguarding your employees health and safety in a high-risk environment.

**Quality and productivity:** supporting your HSE teams by providing them with our knowhow and experience in employee prevention and health education actions.

**Economic:** by delegating medical responsibility to a specialist company, you can focus on your core activity.

The leading French provider of Medical Assistance in the industrial and services sector, PMS Médicalisation (PmSm) is a structure dedicated to the implementation of innovative and customized emergency medical assistance solutions.

PmSm has developed expertise in the implementation and management of the medical response in isolated areas deprived of any immediate medical infrastructure, and/or in hostile environmental conditions (equatorial forest, polar or desert regions, maritime areas, oil platforms, etc.).

Depending on your needs, PmSm can offer a range of services extending from the simple provision of medical personnel to the design and management of a **remote medical centre**.

**Our sectors of intervention:** mining, oil and oil-related industries, steel industry, petrochemical, nuclear, etc.

# OUR SERVICE

PmSm will be responsible for the management of the first aid station, the infirmary or the medical centre on your site.

## **✓ STUDY OF CLIENT NEEDS**

Consideration of the specifications, feasibility study, proposal of organizational methods guaranteeing a quality service adapted to the site context.

### ✓ SOLUTIONS IMPLEMENTED
